## WORK EXPERIENCE

**Notebo**                                                          **June 2020 - September 2020**
*Personal Project*                                                              *Renton, WA*
- Developing an opinionated note-taking app, featuring grid-based notes layout, background sync with mobile companion app, and much more

**The Art of Web Design**                                          **December 2019 - March 2020**
*Final Project*                                                                 *Seattle, WA*
- Learned technical aspects of creating a site, including text markup, scripting languages, and other web tools
- As for the final, I created a website for my personal portfolio, paying attention to user-centered design methodology
- http://anthonyngo.me/

**Global Game Jam**                                                  **March 2019 - April 2019**
*Lead Backend Developer - Hackathon*                                            *Bellevue, WA*
- Lead a team of 4 people to develop a game in under 72 hours
  - The theme was home; our game consisted of the ISS without power from recent meteor strikes, and the astronauts inside survived on the remaining food left while waiting for shuttles to return them home

**Amazon Services**                                               **June 2019 - September 2019**
*Seasonal Logistics Associate*                                                  *Seattle, WA*

- Co-developed badge tracking application to automate generation of daily swipe-in & out metrics
- Helped organize installation of LED lights around the facility, leading to better visibility for the night shift
- Troubleshooted package mislabeling and delivery issues, resulting in better customer satisfaction

**Renton Library**                                                **June 2018 - September 2018**
*Student Volunteer*                                                             *Renton, WA*
- As a student volunteer, I assisted in computer and network maintenance
- Delivered and installed 20 computers for a local library and set up their network
- Integrated 10 gigabit Internet routers without disrupting normal library usage

## EDUCATION

**Seattle University**                                                 **Expd. Grad. June 2022**
*Bachelor of Science, Computer Science w/ Specialization in Math*                *Seattle, WA*
Pursuing computer science with a specialization in mathematics. Studying data structures, algorithms, graph theory, and number theory.
- 1 year of experience in AGILE methodology.

**Bellevue College**                                            **September 2017 - June 2019**
*Associate in Arts and Sciences, Transfer*                                      *Bellevue, WA*
- Cum laude; 3.6 GPA
- Participated in Japanese cultural exchange and robotics association
- 2 years' experience of Java and Python, developing programs as part of course projects
- 1 year of experience in C#, utilizing it for hackathons and game jams
